SOCIAL INNOVATIONS PROMOTING ACTIVE  
AND HEALTHY AGEING

## European Conference

### on Social Innovations for Healthy and Active Life Expectancy

After three years of work exploring how social innovations can support healthy life expectancy the INNOVAGE project will present its findings at a conference in Brussels in October 2015.

The project has focused on social innovations which will have a solid impact on improving the quality of life and well-being of older people. Its key outputs are four major new social innovations in different EU countries, a database of exemplar social innovations which facilitate extended healthy life years and, an evaluation tool which assesses the impact of social innovations on both life expectancy and healthy life expectancy.

Drawing on all these findings, the conference aims to:

- Share the project's activities and results
- Highlight the great potential of social innovations to both improve wellbeing and quality of life
- Help to neutralise the negative aspects of ageing at the individual and societal levels

Registration is free of charge, and a limited number of funded places are available for: policy makers, practitioners, older people and their representatives, companies and NGOs with experience or interest in social innovations for ageing.

**Date:** 14 October 2015

**Time:** 10:00-16:15

**Location:** Brussels, Belgium
